Professional Summary

B.Tech Information Technology student at H.V.P.M. College of Engineering and Technology, expected to graduate in 2027, building practical skills in frontend development through web projects and hackathon participation. Familiar with HTML, CSS, JavaScript, React, responsive UI development, and REST API integration. Interested in creating accessible, user-friendly interfaces and learning through hands-on project work; currently developing a portfolio of frontend and AI-enabled web applications.

Technical Skills

Programming: Java, JavaScript
Frontend: HTML5, CSS3, React.js, React Router, Responsive Web Design
Backend Fundamentals: Node.js, Express.js, REST API Integration
Databases: SQL, PostgreSQL, MongoDB, Firebase
Tools: Git, GitHub, VS Code, Axios

Selected Projects

SolivaGuard – E-Commerce Storefront UI Live Website

- Focused on the customer-facing storefront experience of an e-commerce application, including product discovery and shopping-related user flows.
- Frontend contribution areas include responsive page layouts, reusable React UI components, and consistent interactions across mobile and desktop screens.
- Reviewed storefront presentation and usability; project code and the live site are linked above as supporting evidence.

Authentication & Login System GitHub Repository

- Project covers a React authentication interface with registration, login, email OTP verification, and password-reset flows.
- Uses Axios for frontend-to-API requests and React Router for client-side navigation, connected to an Express.js backend.
- Related implementation includes JWT authentication, bcrypt password hashing, Nodemailer-based email delivery, and PostgreSQL storage.

Talent Track – AI-Powered Placement Platform *National-Level Rackathon Project*

- Collaborated on a placement-platform concept for students, recruiters, and college placement officers as part of a team project.
- Explored placement-preparation workflows such as resume analysis, mock tests, and skill-gap identification.

Amravati Sahayak – AI-Powered Local Assistant Live Demo

- Developed a web interface to help users find local information about hospitals, hotels, and restaurants in Amravati.
- Worked on conversational AI and multilingual user interactions in Hindi, Marathi, and English; include authentication or chat-history claims only for features personally implemented.

Personal Portfolio Website Live Demo

- Created a responsive portfolio to present projects, technical skills, education, and achievements.
- Organized project information and professional links into clear sections and deployed the site on Vercel.

Achievements & Activities

- Team leader for TechnoSphere at the National-Level Rackathon 2026, developing the Talent Track placement-platform concept.
- Participated independently in Amravati AI Summit 2026, presenting the Amravati Sahayak project.
- Participated in a business-plan competition and an IDEATHON, gaining exposure to innovation and problem-solving.

Education

B.Tech in Information Technology (Pursuing) *Expected 2027*
H.V.P.M. College of Engineering and Technology
Sant Gadge Baba Amravati University (SGBAU) Semester 4 SGPA: 9.18/10

Certifications

- Data Structures and Algorithms with Java – Apna College
- Full Stack Web Development – Apna College
